

Analysis - 1

- |— Project Outline - 1
- |— Background to Problem -1
- |— End User - 2
- |— Research of existing solutions - 3
- |— Givers and Receivers - 5
- |— Max Flow - 6
 - | |— Ford-Fulkerson Max Flow - 7
 - | |— Edmonds-Karp Max Flow - 9
 - | |— Settling a graph using a Max Flow Algorithm - 7
- |— High Level Objectives - 12
- |— Low Level Requirements - 13
 - | |— **A** RSA Implementation - 13
 - | |— **B** Debt Simplification - 13
 - | |— **C** Client - Server Structure - 14
 - | |— **D** Integrated Requirements - 14
 - | |— **E** Database Architecture - 15
- |— Project Critical Path - 16

Design - 17

- |— High Level System Design - 17
- |— Expected File Structure - 18
- |— Class Diagrams by Module - 20
 - | |— `crypto` - 20
 - | |— `simplify` - 22
 - | |— `transcations` - 28
 - | |— `server` - 29
 - | |— `client` - 35

Technical Solution - 38

Testing - 172

- |— Re-listing of low level requirements - 172
- |— Unit Test Framework - 175
- |— Evidence of Meeting Requirements for Section **A** and **B** - 182
 - | |— Proof of simplification algorithm - 183
- |— Evidence of Meeting Requirements for Section **C** - 185
- |— Evidence of meeting requirements for Section **D** - 188
- |— Evidence of meeting requirements for Section **E** - 196

Evaluation - 200

- |— End User's Feedback - 200
- |— Individual Requirement Reflection - 201

Unit Tests - page 204
